Celebrate European Vocational Skills Week 2017 and Discover Your Talent!

#EUVocationalSkills

Further Education and Training is an increasingly attractive progression choice for many of our second level student graduates in the region. This choice is being further enhanced by the Government's €20million additional funding for apprenticeships in 2017 and a commitment to 50,000 apprenticeship and career traineeship places by 2020.

Limerick and Clare Education and Training Board, the state education and training authority for Limerick and Clare, is hosting a series of career events from the 20th to the 24th of November to mark European Vocational Skills Week. This European Commission

led initiative will put a spotlight on the wide choice of further education and training opportunities available to learners in Limerick and Clare.

We are delighted to invite you and your students to visit our centres during the week, explore our wide-ranging provision and get answers to questions on apprenticeships, career traineeships and vocational courses. Please see over for more information. The week will close with a Forum Event on Friday 24th November focusing on Further Education and Training as a smart career path to high-quality jobs and increased employability.
